

Care Website Project

Team Name:

Ayat Khaled

Nadine Hazem

Hamdy Abdelhamid

Islam Sayed

Overview

Our idea is to create a website that helps sick people take care of themselves and protect themselves from the covid-19, and provide the best doctors to provide them with a treatment service until they become better.

Goals

-Helping patients to get the best treatment service.

Specifications

User open website, open SignUp page and then insert his data and choice if he a doctor or patient, After this open Login Page and insert his data if he is a patient open Home page it is has top doctor and he can choose doctor and book appointment in this clinic if he booking with doctor will payment depozit , If he don't know clinic way can click on clink to display clinic location on google map, After appointment he can connect with clinic by chat or MobilePhone , It send notification to patient account to remember patient of his appointment and if any appointment cancel will send notification to patient , Application display Patient history in Booking and His medical history.Doctor Profile must insert data to decide appointment Patient should booking in it.
